Grunt   SCRUM   Responsive Design   SQL   Agile Methodology   Continuous Deployment   Git   SVN   Google Analytics   Mixpanel

Experience

Front End Developer
April 2014 – Present
Amsterdam, Netherlands, Front End Developer

- Develop a large scale single page application.

- Use latest technologies such as AngularJS, CSS3, HTML5, SASS, grunt to rewrite and improve previous front end design.

- Use phonegap/cordova to develop IOS and Android mobile applications.

- Work closely with other developers in daily scrum meetings.

- Review other developers code weekly to ensure code quality and that the project remains maintainable.

Java [J2EE / Web Developer](#)
January 2012 – Present
Lorain, Ohio Macy's Systems and Technologies

• Plan and develop large scale projects.

• Review work of other developers for quality assurance.

• Develop using client side web formats HTML, XML, CSS, and JavaScript. As well, as server-side JAVA.

• Updated applications to support responsive design using CSS3 and media queries

• Developed and supported applications through all stages of their life cycle using IBM WebSphere 6.0 and 7.0 application servers.

• Database development using DB2 and MySQL

• Improving code structure and architecture to make it more modular, scalable and maintainable.

Internship Position
June 2010 – August 2010 and June 2011 – August 2011
Lorain, Ohio Macy's Systems and Technologies

• Tasked with building a web application to catalog and view merchandise

• Completed this using Java, HTML, CSS, and JavaScript

• Second internship at Macy's

• Had many projects, a main task was working to prepare the registers to accept payment from Android phones through near field communication

• Gathering business specifications, coding the register machines, testing the phones and registers, and teaching associates how to use this new technology
